Introduction

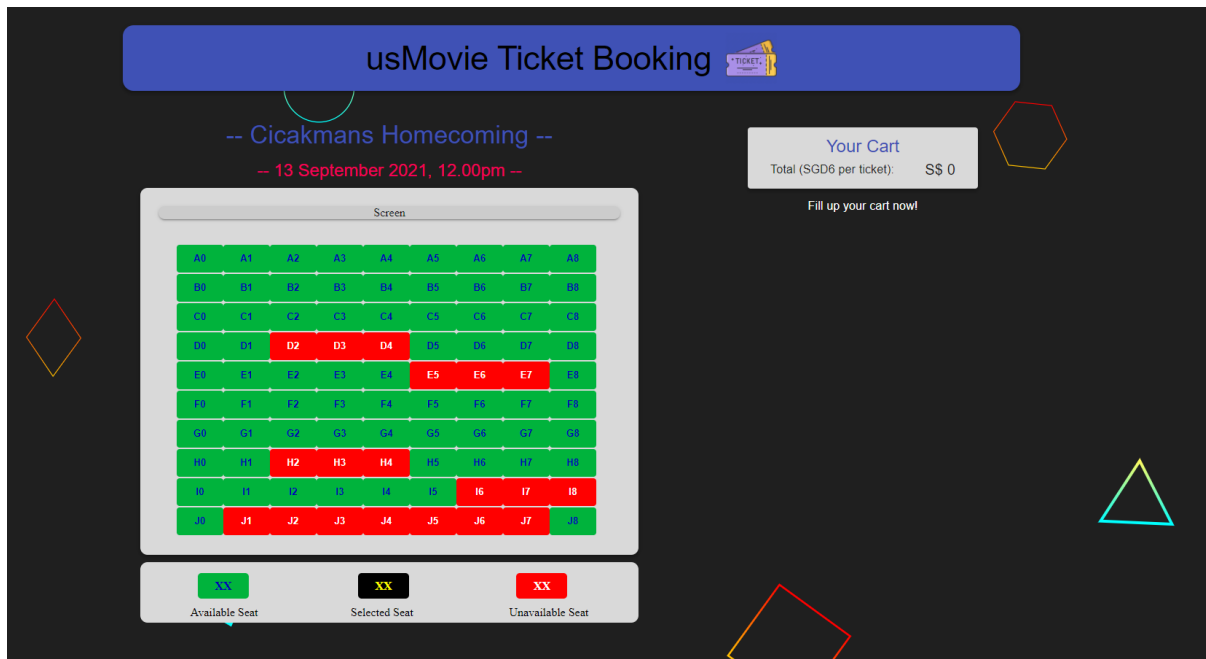

Diagram 1: Overall look of web application

This document is a preliminary user manual that is done for our movie ticket booking web application. It is to assist users in using our web application as well as guiding them through the different functionalities of our web application.

Website

Our web application is hosted on “<https://usmovie-my.netlify.app/>” and User can visit our web application via the link provided above.

Viewing all seats

Upon visiting our web application, Users will be viewing an empty webpage as it requires a little time to load the data from database. The web application will complete its loading automatically and Users will be able to view all the seats for the movie.

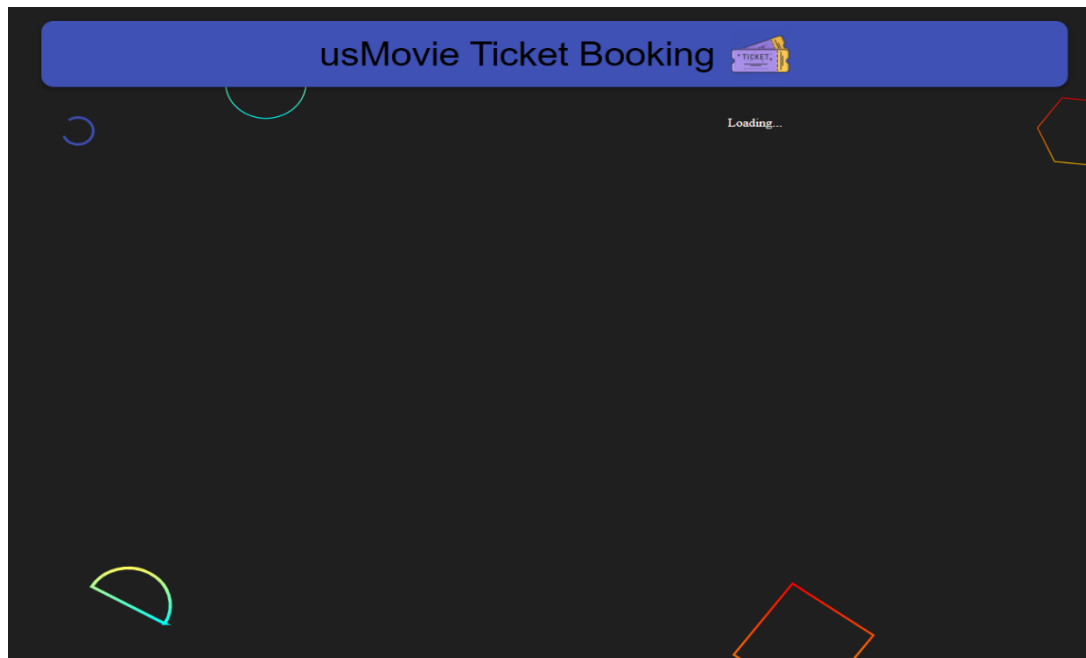

Diagram 2: Webpage loading its data from database.

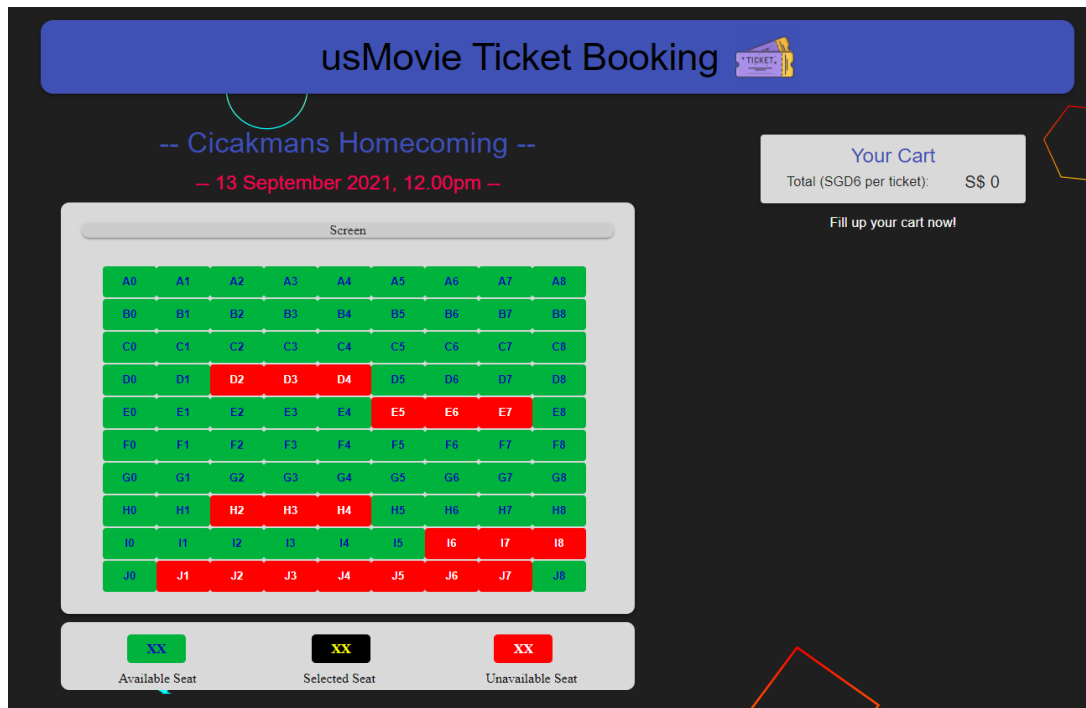

Diagram 3: View of our web application being fully loaded.

Select seats to add it to cart

By selecting one or more green colour seats, Users will be able to add it to the cart. The selected seats will be turn into black colour and the seats ID will be shown at the cart section on the right.

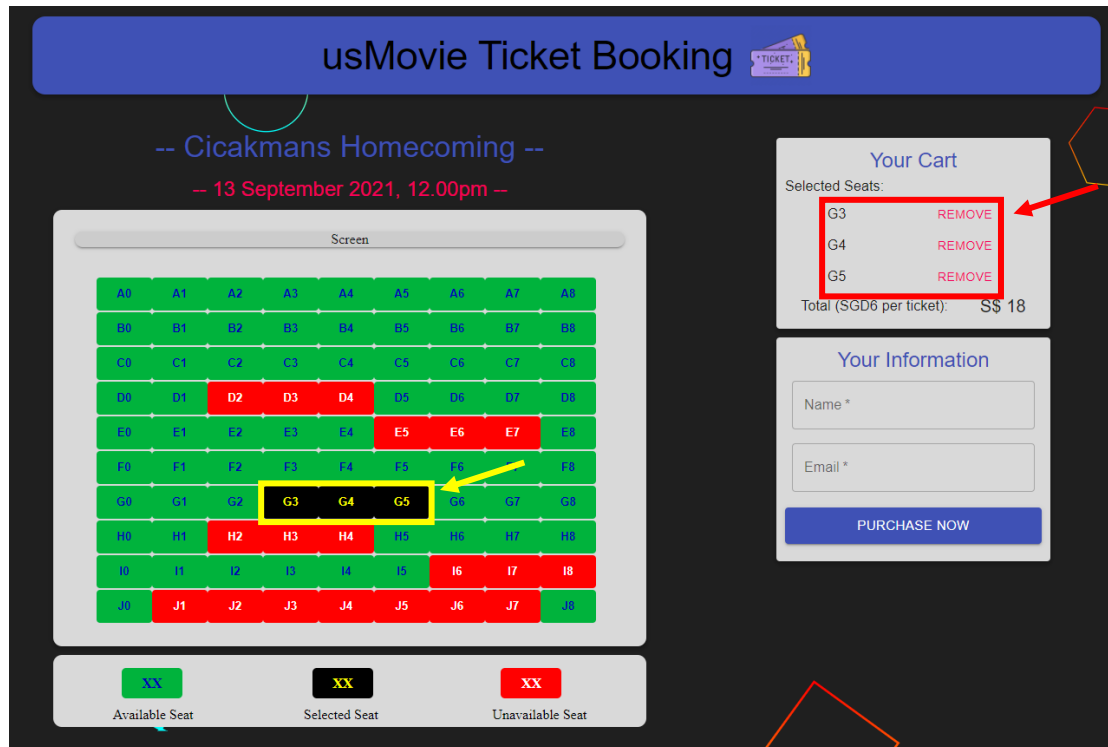

Diagram 4: Three seats are being added to the cart.

Removing seat from the cart

By clicking on the “REMOVE” button beside the desire seat ID in the cart section, Users will be able to remove the selected seat from the cart.

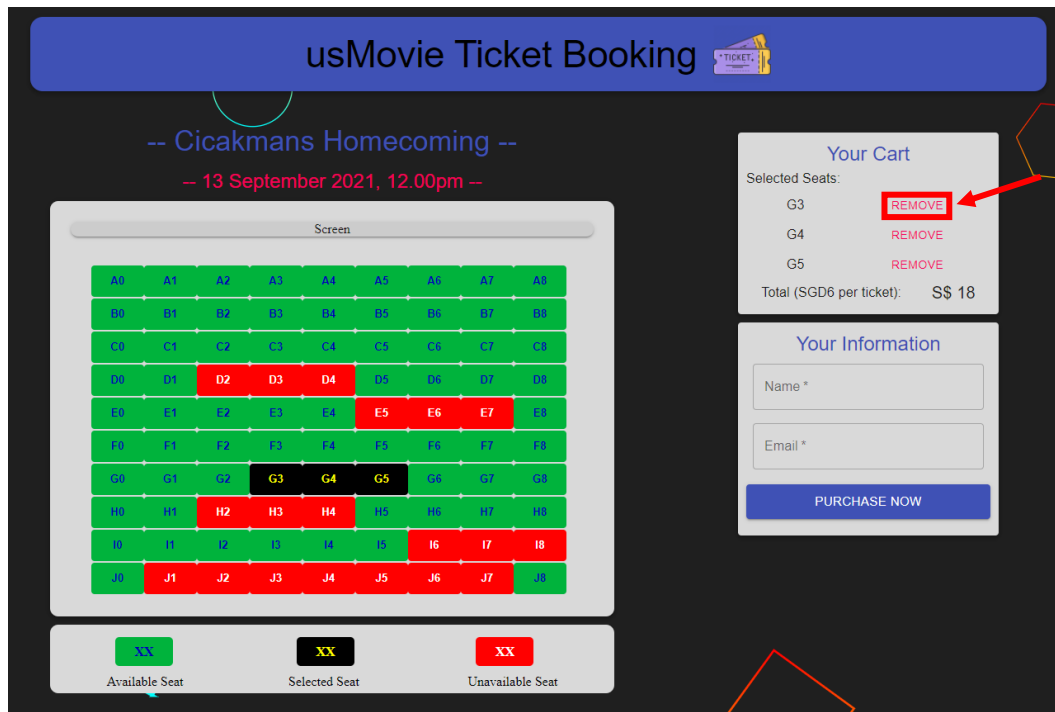

Diagram 5: Removing the seat by clicking the “REMOVE” button.

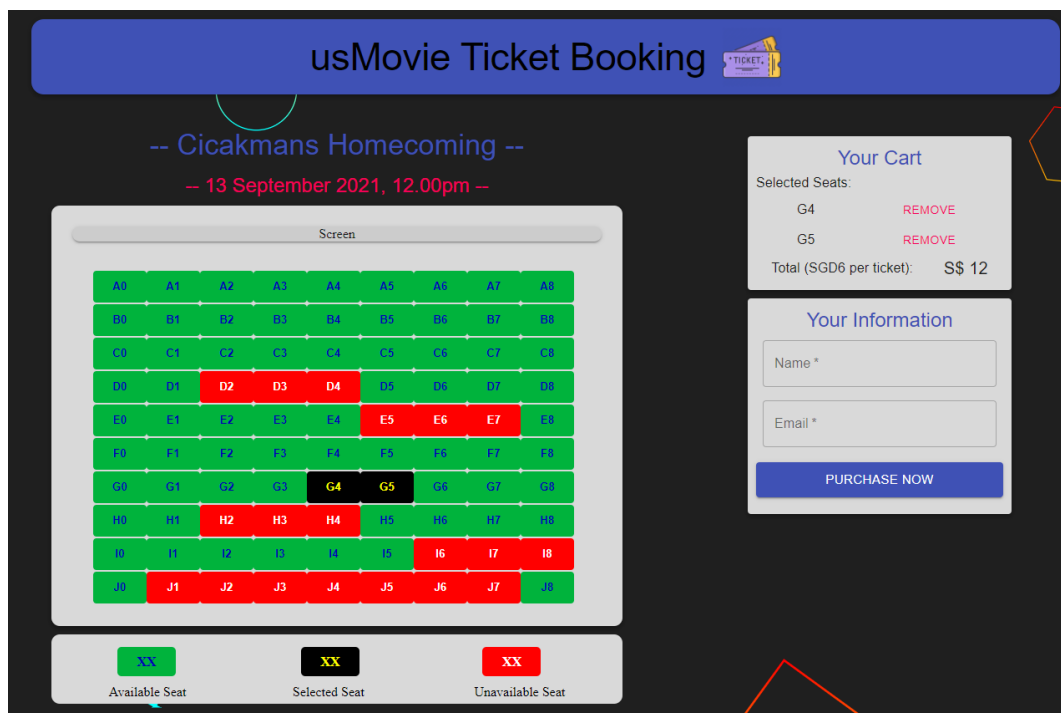

Diagram 6: Seat is successfully removed from the cart.

Confirming the purchase

After the Users have decided to purchase the ticket, Users can fill in the personal details required in the “Your Information” section. Then, Users can click on the “PURCHASE NOW” button and a confirmation email will be sent out to the Users.

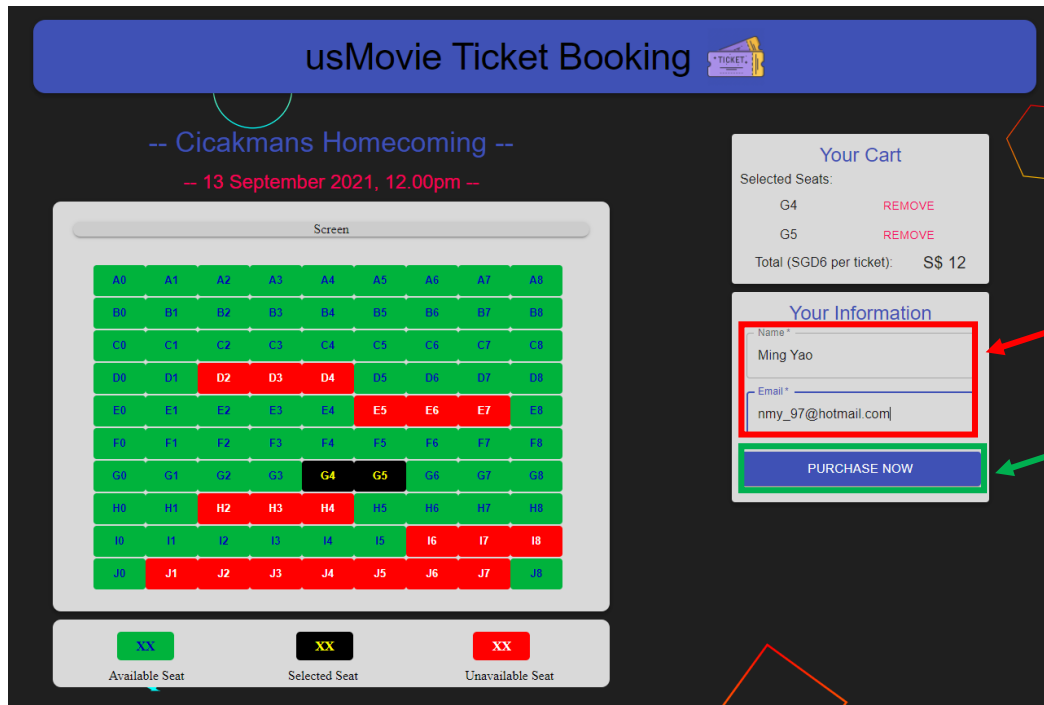

Diagram 7: Users filling up name and email and click on “PURCHASE NOW” button.

Successful Purchase

Upon successful purchase, the seats status will be updated, and Users will be able to receive an email regarding the purchase confirmation.
